Highlight of Major Project

Medical InfoPath Form Conversion

Team: Enterprise Application Development (EAD)

Mentor: Daniel Jordan

Supervisor: Isaac Boven

<u>Task</u>: Transfer old medical InfoPath forms to Microsoft's ASP.NET Core MVC framework

- Greenfield project
- Dynamic form design
- Code-first approach
- Effective database storage and future lookup
- Design with long-term maintenance in mind

UI changes

Iteration 2 Old Form Iteration 1 **Respirator Questionnaire Respirator Medical Evaluation Respirator Medical Evaluation Questionnaire** Employee Demographics Questionnaire Insurance# **Employee** Employee Name: **Employee** Employee Name Phone Ext Insurance # Insurance# Employee Name Phone Ext. Phone Ext. Dept Name: Division Current Work Schedule: Dept. Name Division Current Position Confidential Medical Record at Name: Appendix C to 81910.134: OSHA Respirator Medical Evaluation Questio Confidential Medical Record To the Employee: Can you read: O Yes O No Appendix C to 81910.134: OSHA Respirator Medical Evaluation Questionnaire (Mandatory) Current Position: To the Employee: Part A Section 1, (Mandatory) The following information must be provided by every Confidential Medical Record been selected to use any type of respirator (please print). Can you read: ● Yes O No Can you read? 1. Today's Date: Part A. Section 1 Today's Date: 3. Sex: (Mandatory) The following information must be provided by every employee who has been selected to use any type of resp 4. Your Height: 1. Today's Date: mm/dd/yyyy 6. A phone number where you can be reached by the health care professional who

You are curr	ently charting on:	WELLS	S, BAXTER

Final Iteration

- Refined UI
- Dynamic employee database implementation
 - Employee picture lookup
 - Auto-filling sections
- Multitiered architecture
 - Core, Persistence, Models, Website

Biggest Challenges

- Learning ASP.NET Core
- Building UI from the ground-up

Next Steps

- Refine backend structure
- Submitting form data
- Store pre-existing data
- Convert more forms
