EDUCATION

2018 – 2023

Georgia Institute of Technology

DEGREE	GPA
Bachelor of Science	3.83
Computer Science	*Highest Honors*

SKILLS

AI & Software Structures

- Dataiku DSS
- Agentic AI (ReAct)
- RAG (Retrieval-Augmented Generation)
- Vector Databases (ChromaDB)
- Multi-Model Orchestration
- Version Control: Git, GitHub
- Java, Python, DAX, C, C#
- Procedural Generation
- Data Structures & Algorithms

Industry Software

- Power BI
- Microsoft Power Apps
- Microsoft ASP.NET Core MVC
- Data Analysis & Visualization

Leadership & Communication

- Public Speaking
- Scrum, Agile, Jira
- Project Management
- Servant Leadership Mentorship

Interests & Competencies

- Video Game Development
- Video Editing & Production
- Certified Scuba Diver
- Barista

SERVICE

- Chattanooga Food Bank (2026)
- Chambliss Center for Children (2026)
- Grandview Tech Team (2024 – 2025)
- Appalachia Service Project (2023)
- Casas Por Cristo — Juarez, Mexico (2019, 2020)

Baxter Wells

AI Practitioner & Software Engineer

INDUSTRY EXPERIENCE

September 2024 – Current

Software Engineer — Tennessee Valley Authority

- Deploying a Dataiku DSS generative AI multi-agent chatbot with natural-language querying of SQL databases, saving $0.5M+ yearly.
- Developed multiple Power BI dashboards visualizing TVA's partner engagements, receiving VP recognition for exceptional impact.
- Led, coordinated, and facilitated monthly business unit presentations with 14+ individual contributors.
- Developed intuitive and robust Power Apps, empowering career progression and manipulating production-level SQL data.

May 2022 – August 2022

Business Analyst Intern — Kimberly-Clark

- Developed and globally deployed a Power BI dashboard that increased efficiency of internal enhancement projects by 26%.

June 2021 – August 2021

Business Analyst Intern — Chick-fil-A Corporate Office

- Led a development lifecycle initiative from conception to completion via Scrum sprints, improving first-party delivery efficiency by 32%.

May – August 2019 & June – August 2020 ***Fortune 500 Company***

Software Engineer Intern — Eastman Chemical Co.

- Modernized Eastman's medical data systems by building web applications with ASP.NET Core MVC, C#, HTML, and JavaScript.
- Developed Power BI dashboards to communicate external server metrics, delivering $3.2k+ per month savings.

OTHER RELEVANT EXPERIENCE

August 2023 – August 2024

Campus Ministry Staff — Georgia Tech CCF

- Led 25 university students in 30+ weekly leadership workshops.

INDEPENDENT PROJECTS

Custom AI Agent (BaxBot)

- Developed an agentic AI using Python, Ollama, and ChromaDB.
- Engineered a ReAct loop and long-term memory via summarization.
- Implemented a modular tool-calling registry via JSON parsing.

Independent Video Game Development

- Developed and deployed a nature simulation with procedural generation, complex AI behaviors, and custom GLSL shaders.

CERTIFICATIONS

TVA: Generative AI "Ninja" (2026)

- 3-month (550+ hours) program with a deployed AI capstone project.

Dataiku DSS: Generative AI Practitioner (2026)

Dataiku DSS: MLOps Practitioner (2026)
